

CHAPTER II

Existing Schemes and Fund Flow to District, Blocks and Islands

In this chapter, scheme wise fund flow to district, blocks and islands for a period of one year and five years have been worked out for making convergence between the existing schemes and MGNREGA in Lakshadweep Islands. This Chapter has two sections. Session A deals with fund flow to islands whereas Section B deals with details on expected wage seekers and other details of their households.

Section A

Fund Flow to District

Table No. 2.1 Details of the schemes and flow of funds to Lakshadweep District.

Sl.No	Name of the Scheme	Implementing Agency	Availability of Resources for one Year (Rs. In Lakh)	Availability of Resources for five Years (Rs. In Lakh)
1.	SGSY	Block Development Office	24.39	125.28
2.	Sarv Shiksha Abhiyan (Building Component)	Department of Education	126.92	371.15
3.	MPLADS	Block Development Office	200.00	1000.00
4.	I.A.Y	Block Development Office	41.53	213.25
5.	Afforestation Programme	Department of Forest	23.34	123.69
6.	Coconut Development Programme	Department of Agriculture	72.60	387.66
7.	Organic Farming Programme	Department of Agriculture	34.50	184.67
8.	Horticulture	Department of Agriculture	22.50	119.24
9.	Natural Resource Management	Department of Agriculture	68.00	360.37
10.	Integrated Pest Management	Department of Agriculture	98.80	523.59
11.	Civil Works	PWD	30.00	159.06
12.	Rashtriya Krishi Vikas Yojna	Department of Agriculture	1.38	7.83
G.Total			743.96	3575.79

Source: Computed from Annual Plans 2008-09 & 2009-2010 and Records of DRDA, Lakshadweep Administration, Kavaratti.

The table no.2.1 shows the scheme wise availability of funds per year. These schemes have the possibility of integrating with MGNREGS for its implementation under the convergence model. While preparing the perspective plan of MGNREGA in Lakshadweep, an attempt has been made to integrate the works under

MGNREGA with the existing schemes in the islands. For example, the fund from Sarva Shiksha Abhiyan can be utilized for constructing buildings, auditorium, compound walls and kitchens for schools which are proposed under MGNREGA. The works for seashore plantation and road side plantation can be integrated with the existing afforestation programme in the Lakshadweep. Rural connectivity and anti-sea erosion works under MGNREGA can be linked with civil works under PWD. When implementing these schemes concerned, implementing agencies can mobilize funds for unskilled manual works from MGNREGA by the respective local governments. Therefore, convergence and integration of schemes may be possible. Concerned line departments and local governments have to consider these aspects when finalizing each schemes for every year. Under the major 12 schemes, the available resources for one year are calculated as Rs.743.96 lakhs and the available amount for a period of five years is Rs.3575.79 lakhs.

Fund Flow to Blocks

The block wise availability of resources is also calculated. The convergence and integration is possible at the block level also. The table nos. 2.2 to 2.6 shows the flow of funds from 12 existing schemes in five blocks of Lakshadweep.

Table No. 2.2 :Details of the schemes and flow of funds to Amini Block (Amini & Kadamat islands).

Fund Flow to Islands

The table nos. 2.7 to 2.16 shows the flow of funds from 12 existing schemes to 10 islands of Lakshadweep. Since there are number of implementing agencies at the island level the fund flow is not directly to the respective VDPs. However, it means that the fund is available at the island and it is utilized for the development of the island.

Section B

Details on expected of wage seekers, and other details are given in this section. In Lakshadweep there are 9994 households in ten Village Dweep Panchayats. Out of which 9.02 percent of (902) households are BPL category as per the latest BPL survey. There are 36.36 percent of house holds (3634) are classified as 'marginal farmers', around two percent (234) as 'educated unemployed household' and 61.22 percent (6119) as other households. It is noticed that in Lakshadweep there are no migration prone households except in Bitra island where during the monsoon season a certain households (45%) are migrated to Chetlat island and after the monsoon they used to return back. After a detailed analysis it is found that large majority of house holds are expected to seek employment under MGNREGS. In Lakshadweep islands the expected number of job seekers wants job under MGNREGA particularly during certain months. The number of job seekers may change from month to month and this is mainly due to the trends in labour demand supply, cultural and religious factors and monsoon season. The following table no. 2.17 and 2.18 give the details of expected wage seekers and other details of the wage seekers in 10 Village Dweep Panchayats and five Blocks in Lakshadweep, respectively.

Table No. 2.17 –Village Dweep Panchayat wise details on expected wage seekers
